ADM - /

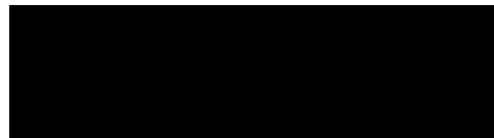

22 MAY 1962

MEMORANDUM FOR: DDR/Ex

SUBJECT : Scientific and Technical Positions

1. In accordance with our recent discussions, the attached lists will give you a general view of the types and numbers of scientific and technical positions in the other three Directorates. As I have indicated, these lists exclude some blocks of such positions in which you have little or no current interest. Overall, these positions are divided almost equally between Headquarters and the Field.

2. We hope that this information will help you in thinking through initial problems in establishing a "Scientific and Technical" Career Service. As we agreed, I'll provide more specifics concerning the organizational and geographic locations of these positions when decisions concerning the details of the composition of the DD/R Organization and the "R" Career Service have been announced.
